

# Lapa Rios Bird Checklist

UNIQUE LODGES  
OF THE WORLD™

2018

YEAR OF  
THE BIRD

# Lapa Rios

## Bird Checklist

The birds listed as "have been seen" at Lapa Rios include the Reserve itself as well as sightings in the Matapalo (beach) area, in and around Puerto Jiménez and along the road from Puerto Jiménez to Lapa Rios; a distance of approximately 19 kilometers (11 miles).

Lapa Rios is a private Biological Preserve of approximately 1000 acres. Access to its trail system is only through the permission of the management. The trail immediately adjacent to the main lodge can be explored without a staff guide, but a staff guide is required for any excursion into the interior of the preserve or along the Carbonera River.

---

### STATUS CODE:

*A = "Abundant" - many seen or heard daily in appropriate habitat/season and/or in large groups at frequent intervals.*

*C = "Common" - consistently recorded in appropriate habitat/season and/or in large groups at frequent intervals.*

*U = "Uncommon" - recorded regularly but with longer intervals and in small numbers.*

*R = "Rare" - recorded in very small numbers or on really rare occasions.*

*Acc = "Accidental" - recorded only a few times at Lapa Rios sometimes far out of its normal range and not likely to recur.*

*Ex = "Extinct" - considered to be extinct in the wild, with no populations on the country and only few sightings in the last years.*

---

### GARRIGUES GUIDE:

We reference Richard Garrigues guidebook for the bird's description. *The Birds of Costa Rica: A Field Guide. Zona Tropical Publications, Paperback – April 12, 2007*
